

Nebraska Medicaid and the Marketplace: How Consumers Obtain Most Appropriate Coverage

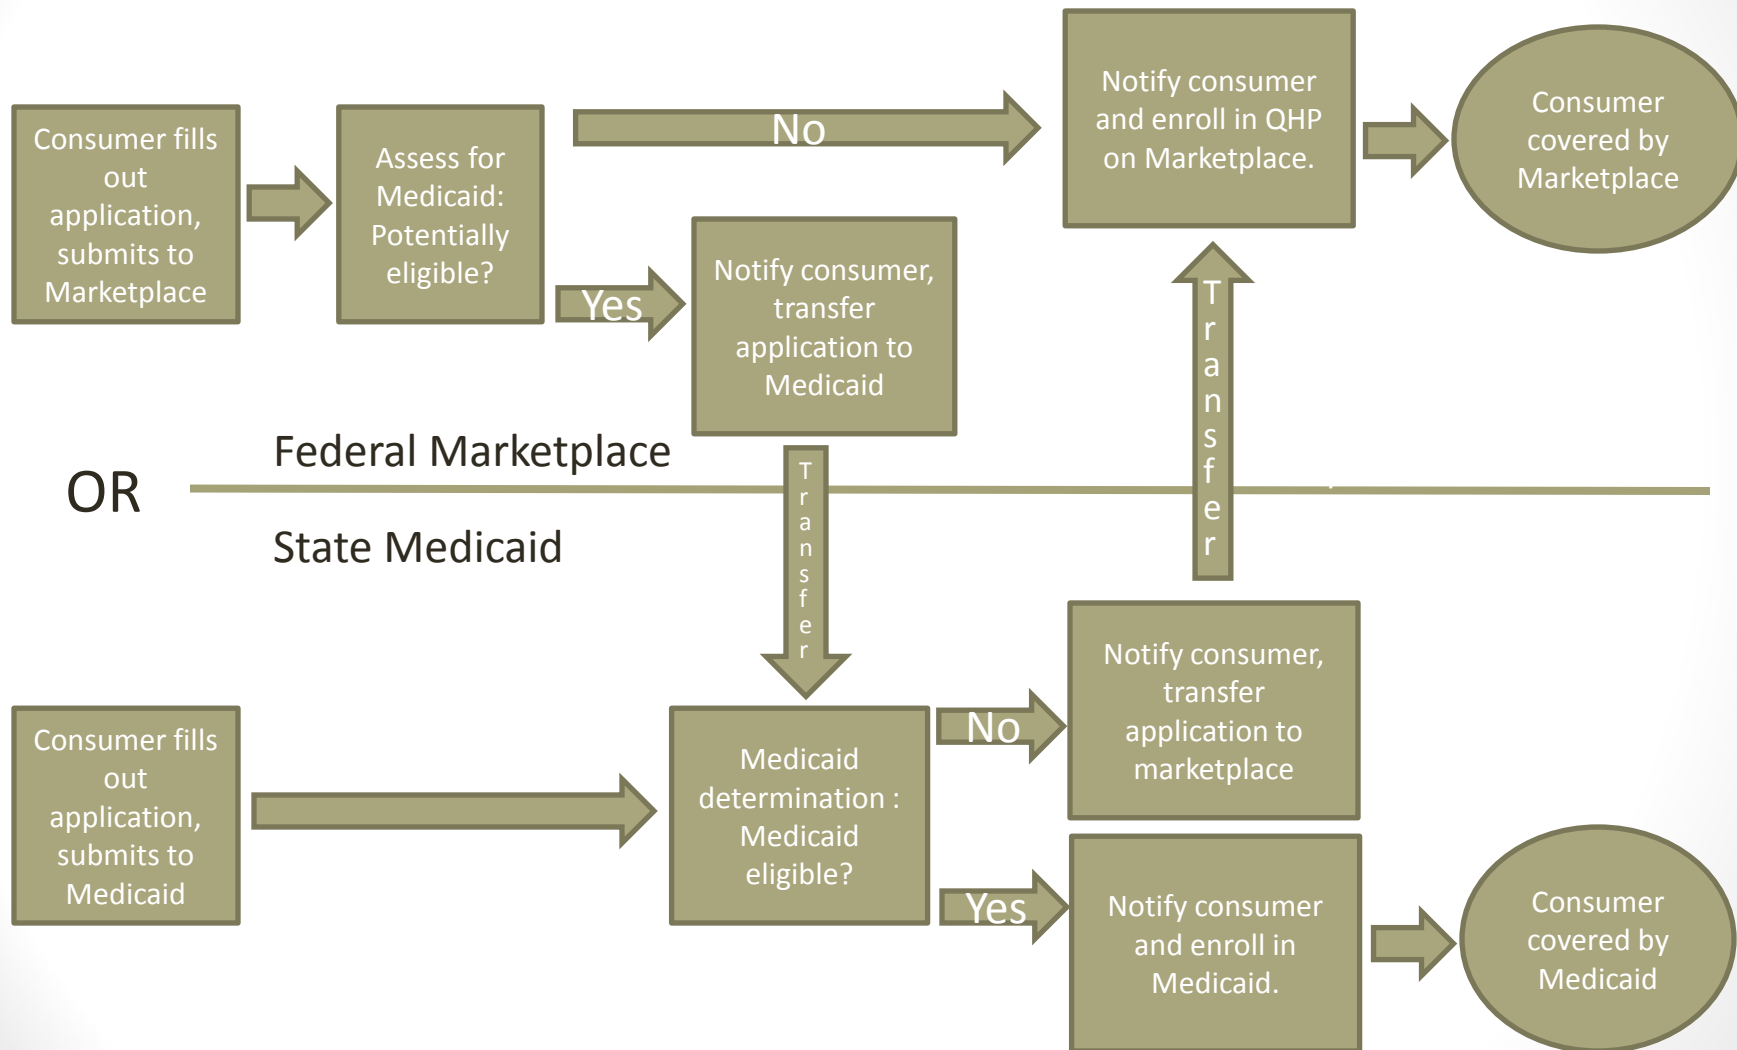

Nebraska Exchange Commission Presentation

November 6, 2013

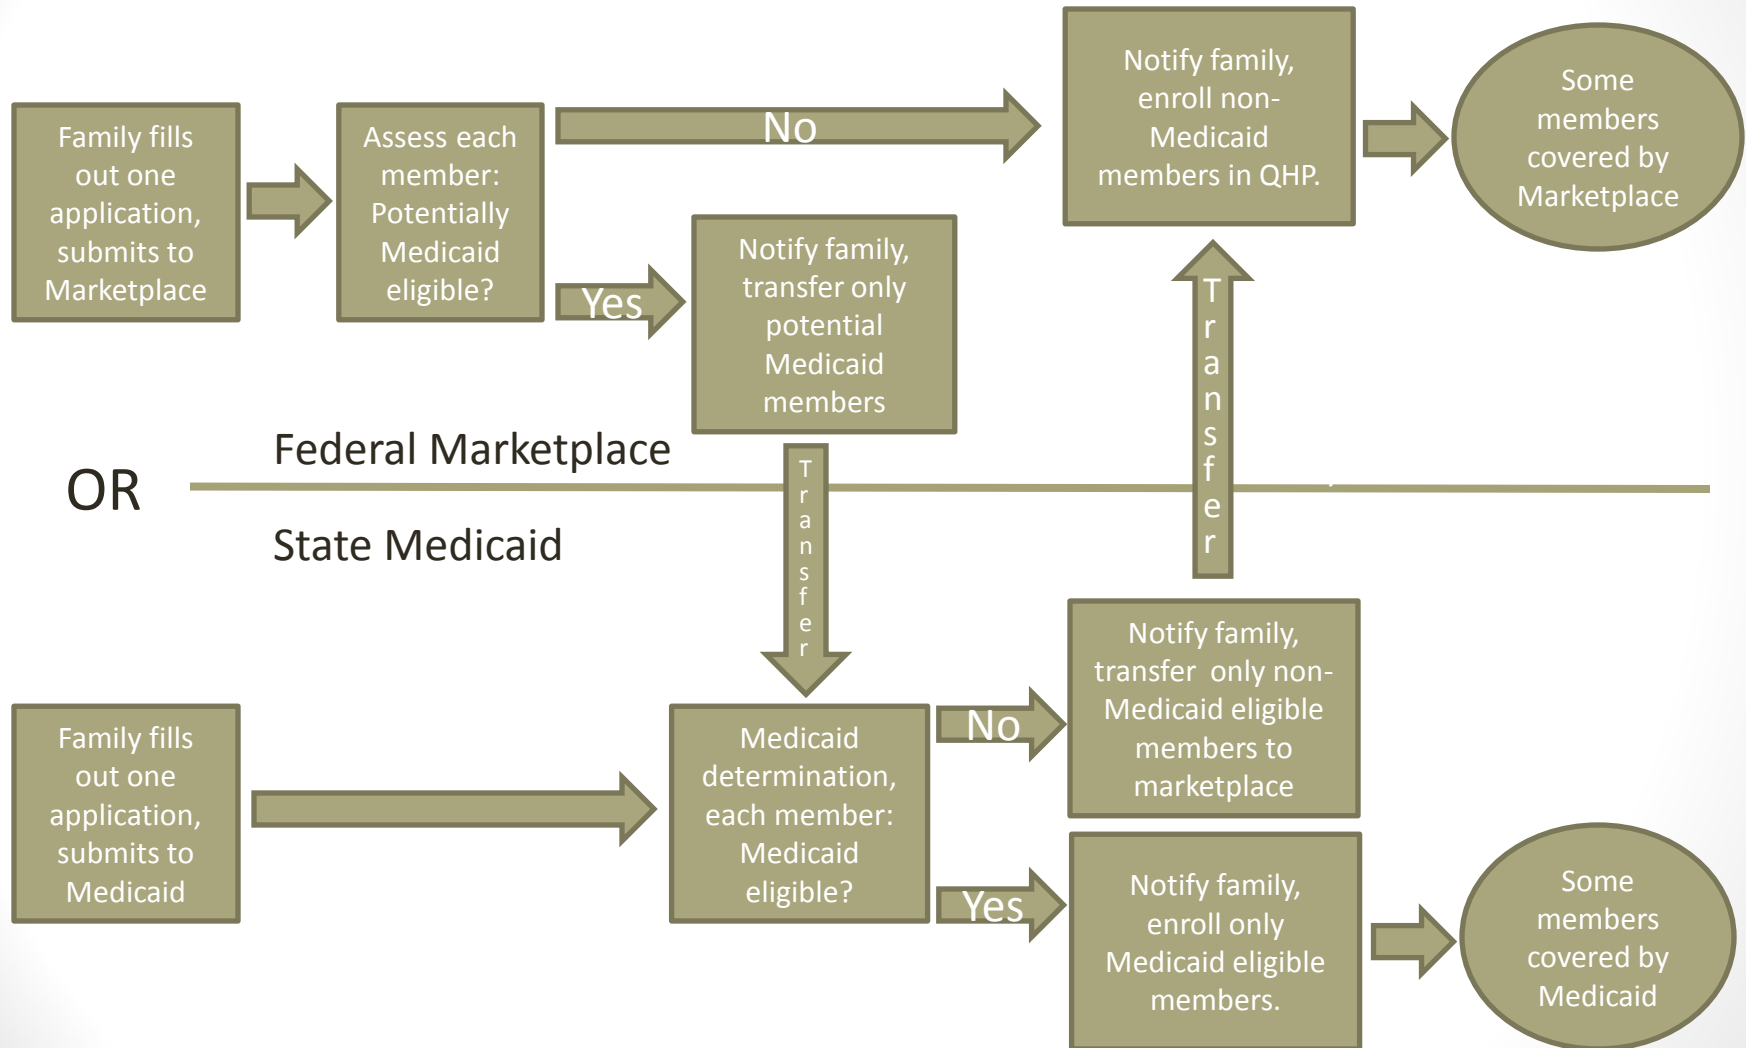

“No Wrong Door”

- “No Wrong Door”: Key ACA principle
 - Consumer applies at Marketplace or state Medicaid and gets routed to most appropriate coverage
- Implementation of No Wrong Door:
 - Federally defined single streamlined application for Medicaid and private health insurance
 - Screening/routing applications between Marketplace and Medicaid as appropriate
 - Notices to consumers informing them of application status
 - Navigators/brokers aware of No Wrong Door, but should start consumers at the “Better Door”
- In Nebraska:
 - State always performs Medicaid eligibility determination
 - Marketplace performs Medicaid assessment and APTC/CSR determination
