A Note About Life and Health Division Checklists

The checklists posted on this page are intended to increase transparency for filers. These checklists are the tools reviewers will use for form filings.

Checklists are posted as Word documents so that filers can download, complete, and submit them with filings. When filers complete checklists, analysts will expedite the review.

The checklists are not required to be submitted with a product filing, but when completed correctly they facilitate the review process and avoid simple objections.

The Life and Health Division welcomes your comments on how these checklists are working, whether checklists need revision, and which checklists should be developed next.

If you have any questions or comments about the checklists, please email the analyst assigned to your filing or call 402-471-2201 and ask for Maggie Reinert or Adam Clayton.
