## Are premium taxes retaliatory?

Taxes imposed by political subdivisions are considered imposed by the state.

## What is included in taxable premium?

Taxable premiums include premiums paid on the lives of persons residing in this state and premium paid for risks located in this state whether the insurance was written in the state or not; including that portion of a group premium which represents the premium for insurance on Nebraska residents or risks located in Nebraska included within the group when the number of lives in the group exceeds five hundred.

Gross Direct Premiums are considered net of return premiums and include all premiums, membership fees, assessments, dues and other payments of similar description, whether collected in cash or notes, and all other premiums credited to premium income, such as premiums in the course of collection and premiums charged to agent accounts. Do not include premiums received on reinsurance assumed and do not deduct premiums paid on reinsurance ceded.
